

Either reuse Template or print twice for the background.

Either stack pieces and cut 4 fences at once or use all 4 templates.

Do not stack the two trees, they are not of equal size!

Make a base that fits the fence and determine its length by checking the shadows with a tealight.

Glue eyes and mouth to a piece of clear plastic and mount them to fence.

**Either have fun making it or don't make it at all!**
